

# Wood Boring Drill Bit Features & Selection Guide

## Bits for Rough Finish Applications

### **BLACK MAX™** Spade Bit

**Spade Bits** - Standard general purpose wood boring bits.

### **WOODEATER®** Wood Boring Bit

**WoodEater® Bits** - Designed for overhead work, rewiring and remodeling. Cut 3X faster and last 7X longer than spade bits.

**Around-the-Corner® Bits** - Designed for drilling curved holes for wiring when a controlled exit point is needed.

**Auger Bits-7"** - Fast wood boring through up to three studs. Screw point tip pulls the bit through for faster boring action.

**Ship Auger Bits-17"** - Fast, deeper wood boring in large timbers, decks and telephone poles. Screw point tip pulls the bit through for faster boring action.

**Bell Hanger Installer Bits** - Extended length drill bits with a hole in the tip for pulling wire through walls, ceilings and floors.

## Bits for Smooth Finish Applications

**Forstner Bits** - Designed for boring perfectly smooth, flat-bottomed holes. Forstner bits also bore off-center or angled holes.

**Brad Point Bits** - Designed for boring smooth, accurate holes. Brad point centers bit for easy positioning of hole.

**Pro-Bore® Self-Feed Bits** - Fast, clean boring of larger diameter holes for running pipe and conduit. Cut faster than hole saws through wood framing.

## Selection Guide

Quality Level	Bit Type (Size Range)	Material to Be Drilled	Application/Benefit
<b>Best</b>	Forstner Bits (1/4" to 2-1/8") 	All types of wood	Perfectly smooth, flat-bottomed holes. Also off-center or angled holes
<b>Best</b>	Brad Point Bits (1/8" to 5/8") 	All types of wood	Smooth, accurate holes. Acute cutting angle for smooth, clean holes
<b>Best</b>	Pro-Bore® Bits (2-1/8") 	All types of wood	Fast, clean boring of large diameter holes (2-1/8" to 3-5/8") for running pipe and conduit. Cut faster than a hole saw through wood framing
<b>Best</b>	WoodEater® Bits (1/2" to 1-1/2") 	All types of wood	Fast holes, specifically designed for overhead work, rewiring and remodeling. Cut 3X faster and last 7X longer than standard spade bits
<b>Moderate</b>	Spade Bits (1/4" to 1-1/2") 	All types of wood	Fast holes. Beveled edge cuts faster than standard spade bits
<b>Best</b>	Around-the-Corner® Bits (7/8" to 1-1/8") 	All types of wood	Drills curved holes for wiring when controlled exit point is needed. Self-centering spur point helps guide bit
<b>Best</b>	Auger Bits (1/4" to 1") 	All types of wood	Fast wood boring action through up to three studs. Screw point tip design provides faster boring action
<b>Best</b>	Ship Auger Bits (3/8" to 1-1/2") 	All types of wood	Fast, deep wood boring in large timber, decks and telephone poles. Screw point tip design provides faster boring action
<b>Best</b>	Bell Hanger Installer Bits (1/4" to 1/2") 	All types of wood	Hole in the tip for running wires through walls, ceilings and floors. Ideal for installing computer, telephone, TV, stereo & security system wires
